

## Theory

**A2-1**  
English (Official)

### James Webb Space Telescope (12 points)

#### Part A. Imaging a Star (1.8 points)

**A.1** (0.4 pt)

Numerical Value for  $d_{\text{image}} =$

**A.2** (0.4 pt)

Numerical value for  $d_{\text{diff}} =$

**A.3** (1.0 pt)

Formula for  $T_{\text{image}}$

Numerical value  $T_{\text{image}} =$

#### Part B. Counting Photons (1.8 points)

**B.1** (0.4 pt)

Numerical value for  $T_{\text{source}} =$

**B.2** (0.4 pt)

Formula for  $\sigma_t$

**B.3** (0.5 pt)

Numerical value for  $p =$

**B.4** (0.5 pt)

Numerical value for intensity

#### Part C. Passive Cooling (4.4 points)

## Theory

**A2-2**  
English (Official)

**C.1** (2.4 pt)

Expression for  $T_1$

Expression for  $T_5$

**C.2** (1.6 pt)

Numerical estimate  $\alpha =$

Numerical estimate  $\beta =$

**C.3** (0.4 pt)

Numerical value  $T_1 =$

Numerical value  $T_5 =$

## Part D. Cryo-cooler (4 points)

**D.1** (1.0 pt)

Quantity Name	State 1	Compare using ">", "<", "=", or "?"	State 2
Internal Energy	$U_1$		$U_2$
Temperature	$T_1$		$T_2$
Entropy	$S_1$		$S_2$
Pressure	$P_1$		$P_2$
Volume	$V_1$		$V_2$

**D.2** (0.6 pt)

Formula for conserved quantity

## Theory

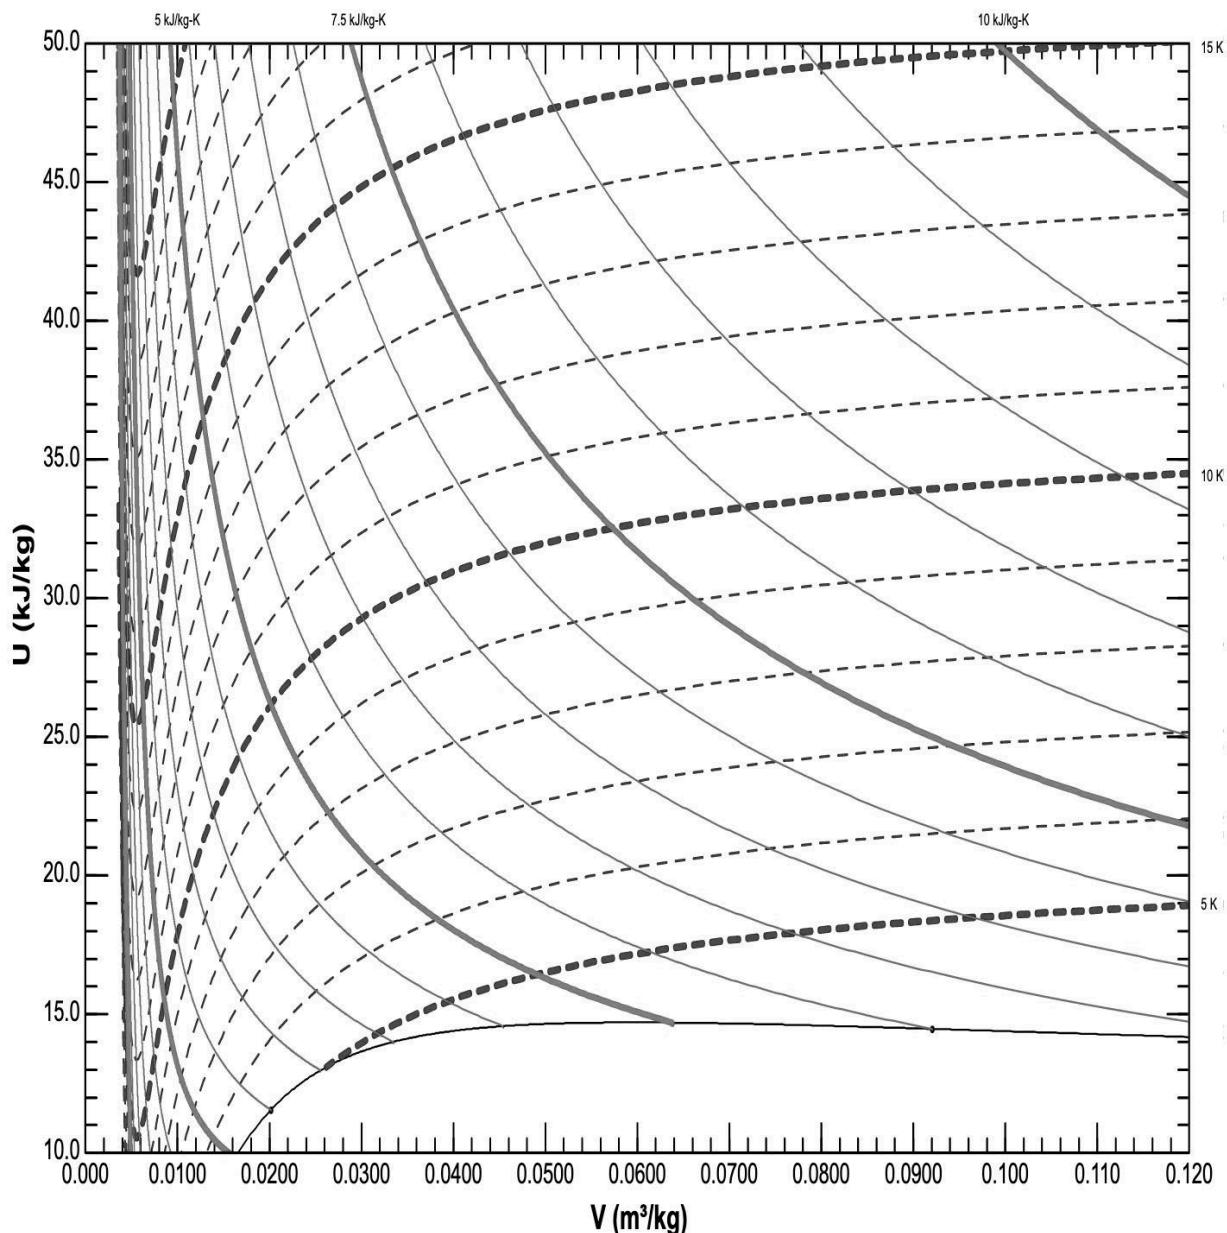

**A2-3**  
English (Official)

**D.3** (1.4 pt)

Solid curves (trending down with increasing volume) are constant entropy  $S$ ; values for the bold curves are on top.

Dashed curves (trending up with increasing volume) are constant temperature  $T$ ; values for the bold curves are on right.

Internal energy (per kg)  $U$  is on vertical axis; volume (per kg)  $V$  is on horizontal axis

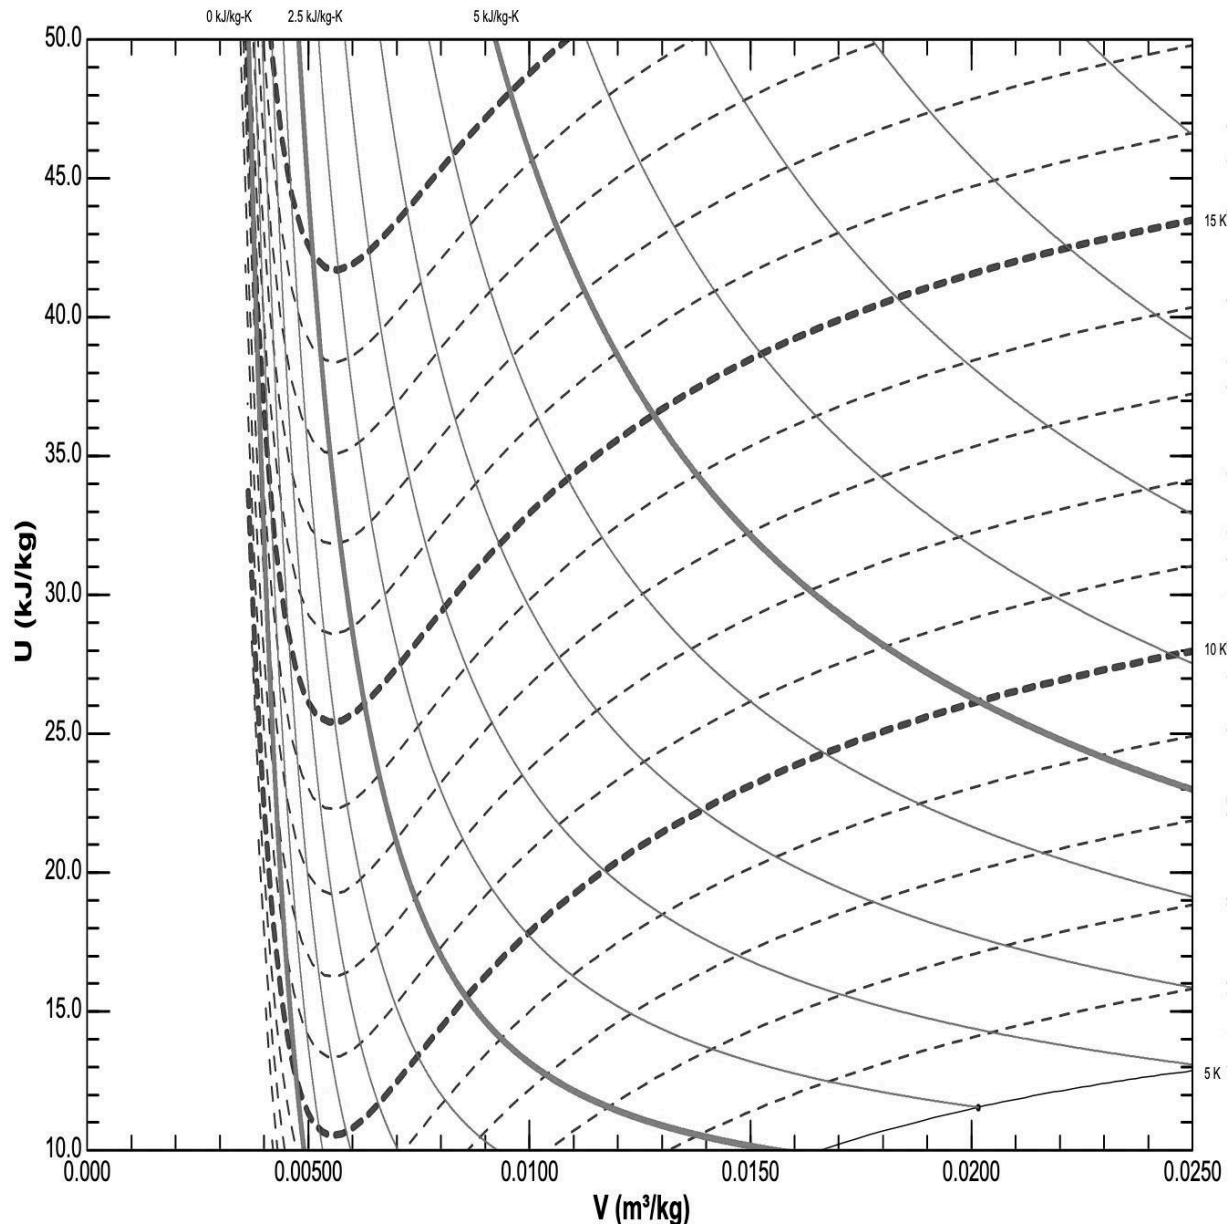

## Theory

**A2-4**  
English (Official)

**D.4** (0.8 pt)

**D.5** (0.2 pt)

Numerical value for  $P_1 =$
